Laser Destroyer Array

An ancient variant of lascannon technology, the multi-barrelled laser destroyer fires a burst of short pulses microseconds apart which have been designed to bore through the most resilient armour.

Weapon	Range	Str	AP	Type
Laser destroyer array	48"	9	1	Ordnance 1, Twin-linked

Power Capacitor

The vehicle's internal volume, which is normally taken up with a munitions store for the more common Vindicator's demolisher cannon, is instead occupied by a bulky reactor-charged power capacitor whose energy stores can be used to greatly increase the laser destroyer's rate of fire. Stability is required for this overcharged firing however, and it is possible for the capacitor to overload the vehicle's energy grid with disastrous consequences.

Capacitor Fire: If the Vindicator Tank Destroyer has not moved this turn, the laser destroyer array becomes an Ordnance 2, Twin-linked weapon.

Overcharged Fire: The owning player may declare an overcharged volley if the vehicle has not moved this turn, in which case the laser destroyer array becomes Ordnance 3, Twin-linked. However, after the weapon is fired in this mode, roll a D6. On a roll of a 1, the Vindicator suffers a single Hull Point of damage.

A Deimos Pattern Vindicator Tank Destroyer may be taken as a Heavy Support choice for any Space Marines Faction Codex (including Dark Angels, Blood Angels, etc.) as well as the Chaos Space Marines Faction.

Legion Vindicators in the Legiones Astartes Crusade Army List

The power capacitor wargear as presented here should be added to all Legion Vindicators chosen from the Legiones Astartes Crusade Army List book (see page 57) which have taken the laser destroyer upgrade at no additional cost.
